

ENERGY MARKET NOTE - NORDIC TRANSMISSION

Kestrel Grid completed its acquisition of Meridian Fuels in October. The acquisition was financed through a credit facility and did not require approval from Northwind Energy under the transmission agreement.

Kestrel Grid is now materially larger than it was when the transmission agreement was first signed. Analysts expect the balance of the relationship with Northwind Energy to shift as a result.

Priya Raman, who leads regulatory affairs at Kestrel Grid, coordinated the filings for the acquisition across Norway and Denmark.

Meridian Fuels operated a portfolio of gas peaking plants whose output overlaps in part with capacity Northwind Energy contracts elsewhere.
